Thats a fair price.
check this tread.

Depending on colour, I would paint one for around £1200. That would include door and boot shuts, but not the engine bay. Also, that would be based on the glass being left in.

A complete colour change for 1400.....?

U want under the bonnet/enginebay/boot painted also? theres no way ur getting that for 1400, and if u find someone who will do it for that money, be sure to check out stuff hes done already to check quality cause thats way to cheap.

Heres a rough guideline, thou sprayers prices vary-quality shudnt

Basic respray(windows left in, paint whats seen only)1200-1400

proper respay(windows out, door/boot jams, backs of doors etc)1500-1700

Full colour change(spray under bonnet/engine bay/boot/interior-with u stripping to bare shell and rebuilding)2000-2500,

With the spray shop stripping to a shell and rebuilding-approx 4000

I'd be charging that cos the shell would already be stripped... If I was stripping it it would obviously be

more
