Thinking of buying an MR2 again and just wondering if anyone has an opinion on this one?

It's just gone into cheap tax and has an NCT too, which are the positives. Negative s probably the colour and the fact that it's an automatic...

€3000 seems a bit steep for a n/a.

The automatic gearbox would put me off.

I suppose if the body, engine, brakes and suspension are good, then it may worth a look.

Negatives outweigh the positives on that one

Automatic and the wayyyyyy slower 3SFE engine...I'd pass on it personally
