

MR2 SW20 Rear lower quarter panels

Posted by Marty J - 2021/04/22 18:00

I'm looking for rear lower quarter panels left and right (the part that you cannot see because it's covered by the rear bumper).

They should be in good condition with no rust. Faded paint and scratches are acceptable.

As long as they are from a MKII SW20 then year is irrelevant.

If you know of anyone breaking a MKII SW20 in Ireland north or south, please let me know.

Nice one Marty. I have kicked off a bit of a restoration on my MR2. It's been off the road for years but will be 30 years (Vintage) next year. The biggest issue to overcome seems to be rust in sills etc. I bought some new sills and am checking over the car from top to bottom to make a list of repairs for the welder...

Make sure you check the rear panel behind the bumper. I was shocked to see how rusty they are.

At some point, I will weld a cover where my antenna used to be. I would prefer a more modern antenna that is discrete.
