Found some really nice Spyder shots online. This guy seems to have fitted a pretty decent turbo kit also...

Awesome car man! (Click to enlarge)

compact intercooler design, but good capacity by the look of it

intercooler sitting under the car, not sure it would flow real well with the bumper back on though?

Exhaust looks good and quiet - bit of a sleeper ;)

I bet this is a lot of fun to drive! :cheer:

what do you think?

Only just noticed but in photo 2 I can see a couple of AE86's, a TA22 and what looks like a Mazda Capella or possibly a Datsun 1200??

City skyline looks good in pic 4 also, possibly Miami? has a bit of a Dexter feel to it :cheer:
