I would suggest the transparent red looks awesome rather than plain red, I have a set at home but the nipple needs to be changed on my mk1 for them to fit :groan:

I am interested in some custom lines, but don't need them just yet. Can you modify the hard lines e.g. to install a hydraulic handbrake ?

This offer will be extended until Friday 28th October!

Come on guys its time to get your brakes sorted out in time for winter!! B)

If we dont get the full numbers we will honour the offer for those on the list.

Andy :woohoo:

Hi Marty,

Yes the hard lines can be modified although this is quite labour intensive.

Andy

Of course!! Full stainless steel braided lines giving you a firmer and more responsive feel

Dont be fooled by cheaper "performance lines" which are stainless braid with mild steel end fittings... HEL lines are fully stainless therefor come with a lifetime warranty!!
