

What polisher to go for?? MR2 so far....

Posted by GZLoc - 2014/05/26 22:36

Ok so "2" ownership has been interesting so far! Tomorrow a full service today she has a new clutch/Timing belt and water pump (only took a month). Oh and boy does it feel good. for 10 minutes before.....out for a spin plastic underneath came loose and a very slow drive home to the kiiiiiiiiisssssshhhhhh sound of plastic meets tarmac! :S

Have been busy mainly on the inside stereo, gear-knob, gator, uprated the speakers, went for the cheeky speakers behind the seats. Cannot figure how to get the new electric aerial I bought working with the Sony head-unit but will try again soon. So bar getting a leather repair/new drivers seat and central locking on the drivers side working the big jobs are done!

A kestrel polisher or similar will be my next purchase when I get a few euro raised.Anyone with any recommendations what to buy?

A big thanks out to japohara for most of the interior bits so far. Cheers lad, Revs did a great job on her!
