Hey Ben,

Can you confirm if shipping to Ireland fits in to the 'UK' bracket or 'Europe' bracket?

Often I've bought from Camskill at the same delivery price as north (UK) or south (Europe) of Ireland.

warning for you guys!!

i have this set of lip on my car right now. it's called the holy lip. fit great and look great. but, be on the look out for copy. just wonder, what company you are buying this group buy from? make sure ya get them from ems powered or holy. those are the real deal. if you buy them from chaser or other

company. the fitment will not be the same. some buyer don't even get their item. the pic posted up on the first page is from holy's photo.

please read this link i posted up. it's from holy talking about the front lip

Thanks for that mate, the holy lip comes from america and yes its a very good fit but everyone knows on the forum that I am not in the business of ripping people off and my products are all an excellent fit.

The link to MR2OC USA is about Chaser and I agree I have read some really bad horror stories about them, one main one being the wide fenders group buy its not a nice read. Anyhoo we have decided to make some fenders, if you checked MR2OC USA you'll see I am a registered trader there and so far everyone seems very happy with our products and service B)

i have heard from holy that chaser change their company name and pay off mr2.oc to be a seller back on there with a clean record. and the deal was... if anyone give them a bad rateing or a bad comment. their post get delete. as for the lip goes. holy have them copy right already. so, other company should

not be making his lip. mr2.ie have become my second home. so, i'm just looking out for the guys here. i have email holy to come on this thread to check it out. but, if you are the real deal. you have nothing to worry about.

Hi Ben, no I only got the email where you said that the shipment would be held a few days to let the Christmas rush of parcels go through. I am happy enough with that idea as I'd prefer to receive it in good shape.

Secondly, these splitters are made by you in the UK right? not by Chaser or in another country?

Hmmmm very dodgey if thats whats happening with MR2OC and Chaser we'll have to keep an eye on that one. In regards to the lip Holy dont have copyright the lip was originally made by Aeroware this is the company that designed it from scratch so if anyone owns the rights its them

the holy lip and the aeroware lip is not the same lip. look very close alike. the aeroware lip stick out more then the holy lip. also, the red mkII picture you posted up is a aeroware lip. the first few pic you posted up is from holy lip. those holy lip are now copy right. i rather wait until dave (holy) get on here. he can give out more detail then i can. since it's his lip.

Hi Frank,

I took a look through the thread but I can't see the red car you're talking about?

No one wants to see a repeat of the Chaser problems that plagued the MR2 community. Ben has

served the MR2 community in UK/Ireland with quality products for many years. This is the first time I have bought anything from him but I did some research up front and mostly people had good feedback on their dealings with him so I thought I'd give it a whirl for this piece and see how it works out.

Posted by frank-the-tank - 2011/01/12 11:11

hi Quandry, here is the red mkII with the aeroware lip. if you look closer. the lip is stick out longer almost like the greddy lip. but, not as long.

<http://i954.photobucket.com/albums/ae24/theblackmushroom/aerowarelip1go3.jpg>

and the lip you guys just got from this group buy is alot shorter. very close to the 93 lip.

Ok lets sort this before it gets out of hand.

Quandry thanks for your input its appreciated :)

Frank, the lip we sell is a replica Aeroware lip the supplier I bought it from confirmed this and I have had it checked with other Aeroware lips on cars in the UK which are all the same. Here is a better photo from one of our customers, as you can see its the same as the aeroware lip.
