

Wheel Nuts - 14 colours!

Posted by SteveH - 2011/09/20 22:26

Hi all,

Don't know about you guys but I BADLY need new wheel nuts and came across this site:

http://www.taperpro.co.uk/aluminium_nuts.html

I am going to be getting yellow wheel nuts anyway but thought I'd see if anyone else was interested in that or other products, then once I have numbers I can go back to them and see about discounts :)

wow! they've got some really nice stuff. I'm liking the look of the racing nuts with the rotating washer:

I'm a bit stuck at the mo so can't join the group buy but good find on the link - kc!

Just got an email back from them. Price of the aluminium nuts is 39.99 but they don't have yellow, only gold. So I may be out of this!

Argh. My kingdom for a set of yellow nuts :D

I may just have to enquire about getting a set electroplated :(

my nuts are covered by a center plate :(these do look really cool though, too bad they dont make some open ended ones for people running extended wheel studs
