

UK / Irish mkII SW20 rear impact beam wanted.

Posted by Marty J - 2017/06/20 18:53

I am looking for a original registered UK / Irish mkII SW20 rear impact beam. Must be in good condition.

Japanese imports are no good to me as they have a different shape.

Yeh I have seen them, it's the postage price from the UK to Ireland that I don't like.

Jap import will fit, it's not same shape. The import is thinner in the middle.

So not just fit a Jap one? It's not like you're gonna see it when fitted :)

I will be fitting the F430 rear bumper and I wanted the UK version because it looks like it would be more robust.

Anyway I might just fab a custom one. I have been in touch with a place that sells T45 bars.

In the grand scheme of things i doubt there's much difference between the 2 of them, if either of them takes a hit you're going to be looking at a big bill.... You can have my Jap one for £25, no fab work required :)

I have made up my mind. I am going to fabricate a rear impact beam out of T45 and S515. I will have it powder coated once built.

I don't need a Toyota rear impact beam now.

Fair play if you can fab one yourself, though it's gonna cost you more than just fitting a used one.
