Is this what you're after?

or is it the actual radiator from the front of the car? If it's the actual radiator from the front then i'm afraid you're out of luck it was rotten.

It's in perfect condition, just a bit dirty. Postage is liable to be quite pricey due to it's size. I'm only an hour away from Dublin, i'm based in Newry so we could always just meet up. I also have a gas strut for opening the engine lid if your interested, assuming i can find it, I have quite the collection of parts lying about :)
