

MR2 Turbo parts wanted

Posted by basch32 - 2018/02/20 08:13

Hi all,

Looking for the following:

Gearbox speed sensor for a Rev 3

Calipers as mine are sticking or suggestions on rebuild kit.

Any front bumpers going (aftermarket also) in white.

Thanks

Baz

Hi Baz,

Not too many of us around here now, guess everyone moved to facebook (?)

Anyways, I had sticky brakes on my rev3 turbo 3 times on different calipers over the last 5 years and I always got lucky, no parts (slides/seals) were required. Only a disassembly and re-lube which costed very little money.

Last occasion was a little different, but the caliper didn't need new part at all. I had to buy however a set of pads and disk as the inner pad twisted a bit and worn the inner side of the disk. You might get lucky as well, just don't wait around too much as the generated heat will destroy them eventually.

Won't be easy to find the speed sensor (33403-19476)

Good luck,

Julius
